

We start by creating a new VPC.

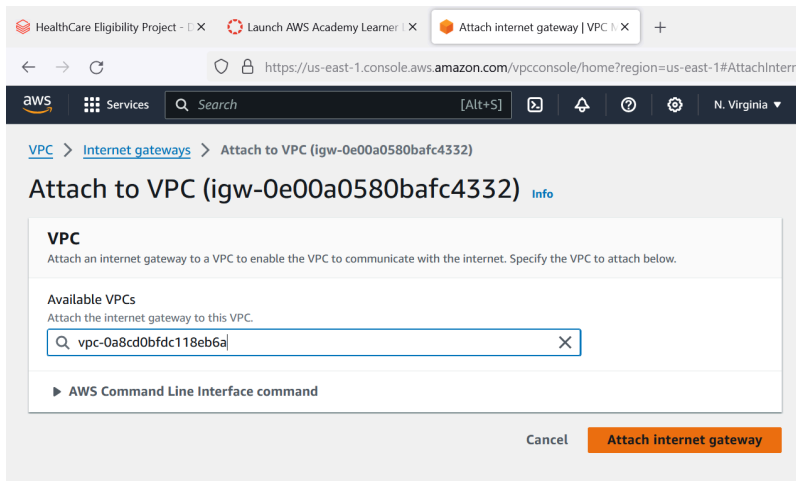

We can see a new VPC is created.

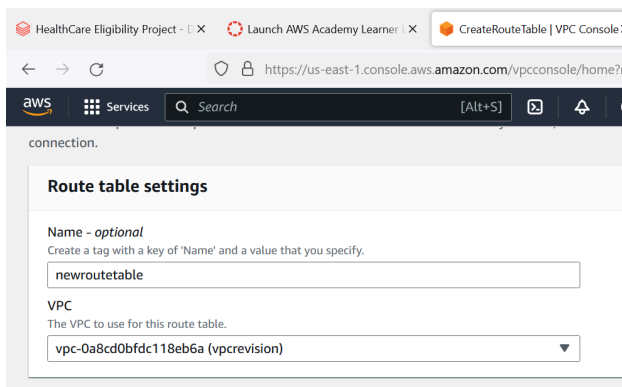

We create two subnets and attach a VPC that we recently created.

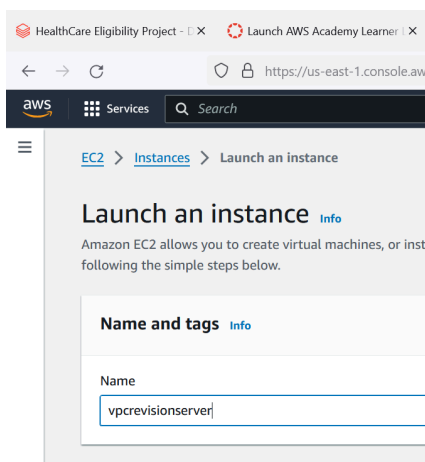

Then, we create an Internet Gateway and attach our VPC to it.

Then, we create a route table, attach a VPC to it and associate subnet.

Then, we create an EC2 instance and select Amazon Linux as AMI.

We select ssh and HTTP for security groups.

The screenshot shows the 'Inbound Security Group Rules' configuration in the AWS Management Console. Two rules are defined:

- Security group rule 1 (TCP, 22, 0.0.0.0/0):**
 - Type: ssh
 - Protocol: TCP
 - Port range: 22
 - Source type: Anywhere
 - Source: 0.0.0.0/0
 - Description: e.g. SSH for admin desktop
- Security group rule 2 (TCP, 80):**
 - Type: HTTP
 - Protocol: TCP
 - Port range: 80
 - Source type: Custom
 - Source: (empty field with placeholder 'Add CIDR, prefix list or security group')
 - Description: e.g. SSH for admin desktop

We attach VPC, public subnet to it and enable assigning public IP.

The screenshot shows the 'Launch an instance' wizard in the AWS Management Console. The 'VPC' and 'Subnet' sections are expanded, showing the following configuration:

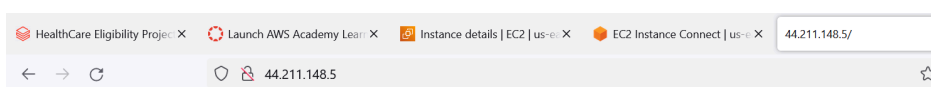

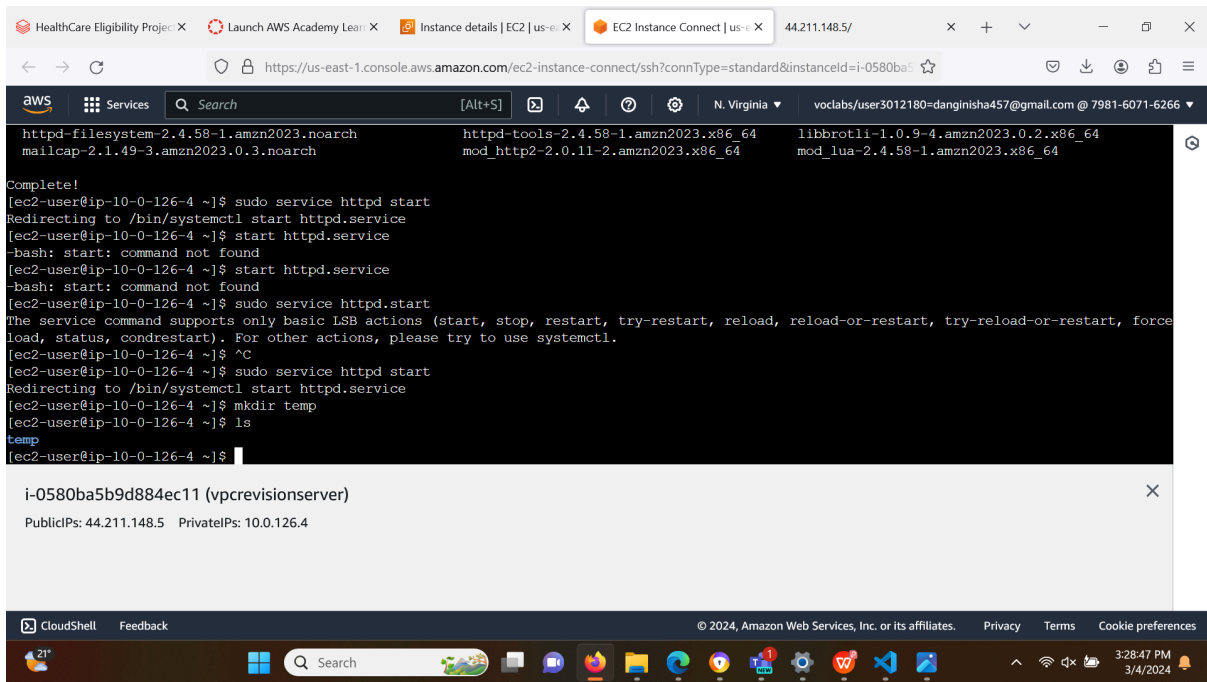

- VPC:** vpc-0a8cd0bfdc118eb6a (vpcrevision) 10.0.0.0/16
- Subnet:** subnet-091fa8319239e4550 subnetrevisionpublic VPC: vpc-0a8cd0bfdc118eb6a Owner: 798160716266 Availability Zone: us-east-1a IP addresses available: 16379 CIDR: 10.0.64.0/18
- Auto-assign public IP:** Enable
- Firewall (security groups):** Create security group (selected) or Select existing security group
- Security group name - required:** launch-wizard-7
- Description - required:** (empty field)

The 'Summary' section on the right shows the instance configuration:

- Number of instances: 1
- Software Image (AMI): Amazon Linux 2023 AMI 2023.3.2...read more
- Virtual server type (instance type): t2.micro
- Firewall (security group): New security group
- Storage (volumes): 1 volume(s) - 8 GiB

The 'Launch instance' button is visible at the bottom right.

So, when we connect, we can see that it works.

It works!
